As is known, exports play an important role in the foreign economic activity of any state. The prosperity of our country's economy is directly dependent on the growth of export potential. During the years of independence, the export potential of our country has changed radically. The role of small business in this is also invaluable. Small business entities today offer the domestic consumer market with import-substituting goods. Small business is also becoming the most important sector in the country's economy. The share of small business in agriculture, trade, consumer services, catering, hotel and tourism activities is very large. In recent years, as a result of modernization of industrial sectors, technical and technological transformation of production, deep structural changes and diversification in industry, industrial sectors are developing even in rural areas. In this, small business is one of the main leaders. The share of small business in industrial production is also increasing year by year.

The share of small businesses in industrial sectors is increasing in the food industry, processing industry, and light industry. Gradually, small business entities are expanding their activities in other important sectors of the industry. Another goal of developing small businesses is to improve the spiritual, educational, and cultural work of the country. Because small businesses also contribute to the development of spiritual, educational, and cultural spheres. Spiritual, educational, and cultural reasons for the development of small businesses in our republic:

- promoting the revival of traditional folk arts and crafts;
 - establishing sports and recreation facilities;
 - opening private educational institutions;
 - landscaping, beautification, and environmental education;
 - organizing children's, adolescents', and youth camps.
- Over the past 3-4 years, as a result of the reduction in the state's share in the country's economy and the implementation of free market mechanisms, there has been a fundamental shift in the development of small businesses. In particular, the share of small businesses and private entrepreneurship in the economy is also increasing. In particular, the contribution of small and private enterprises in the manufacturing sector is increasing.

In conclusion, it can be noted that the further development of small and private entrepreneurship in the national economy will ensure poverty reduction, self-employment, development of service sectors in makhallas, etc. Increasing the role of local institutions in terms of efficiency - providing entrepreneurs with the best opportunities to create a new enterprise, as well as creating favorable conditions for its further activity and development:

1. In order to further develop small business and private entrepreneurship, it is necessary to first establish specific sources of financing for business entities, including funds from the population, extra-budgetary funds, loans from entrepreneurs, commercial banks and financial institutions, grants from international organizations and foreign countries, and the activities of credit unions in accordance with international standards.
2. Create incentives for newly established small business entities that build facilities for their own needs by small businesses and private entrepreneurs to pay a single tax.
3. Establish cooperation between small business entities and private entrepreneurs and large enterprises in the scientific and technical field. Strengthen the legal framework for the mechanisms for organizing large enterprises' services such as accounting and marketing on an outsourcing basis. entrepreneurship
4. We consider increasing the participation of small business and private entrepreneurs in public procurement, further simplifying the field of public procurement for their entities.
