### REFORMS IN PRACTICE: WORK, RESULTS AND EFFICIENCY

Nigina Shoeva

Shorchi district administration

Head of Information Service

The reforms and creative work being carried out in our country serve the well-being of the population. Improvement and greening work are being carried out. Practical work in this regard is also being carried out in the Shorchi district of the Surkhandarya region of the Republic of Uzbekistan. In particular, as part of the national project “Green Space”, which is a very important and consistent with our values, the call of the head of state is to plant seedlings. There is a joke that a shepherd's staff forgotten in the plow takes root by spring. In fact, this is not a simple story. This is an expression of the richness of our soil and its harmony with the ground.

It has been three years since the launch of the national project “Green Space” in our country. Everyone from seven to seventy years old has responded to this initiative of the head of state. Planting seedlings is also being carried out in the Shorchi district of the Surkhandarya region of the Republic of Uzbekistan within the framework of the program. Within the framework of the national project "Green Space", the Gulistan mahalla in the district was selected to be transformed into a "Green Mahalla". Work is underway to plant lemon and grape seedlings in the plots of land of the residents of the Gulistan mahalla. A campaign was held to encourage citizens in the mahalla to plant lemon and grape seedlings in their plots and get a bountiful and high-quality harvest. Lemon and grape seedlings planted with love and care will certainly allow for a bountiful harvest.

Over the past period, as in our country, Shorchi district of Surkhandarya region has achieved many achievements, high indicators and milestones, and high development processes are underway in all areas. In particular, over the past seven years, the

number of entrepreneurs in the district has increased by 1.8 times, the volume of industrial products by 3.9 times, and the provision of services by 4.6 times. However, at the same time, it is necessary to solve the problems that have accumulated over many years and, of course, create appropriate conditions for our people to live well and prosperously. In order to further develop the district, increase the well-being of the population, and turn it into a prosperous, beautiful and prosperous place, the main principle is to "please the people." In terms of developing the district's economy, in 5 years, the volume of industrial production will be increased to 2.3 trillion soums or 2.7 times, the volume of agricultural production to 2.6 trillion soums or 1.2 times, and the volume of services to 4.4 trillion soums or 5.3 times. In ensuring the growth of industrial production, special attention will be paid to each industrial sector. In particular, in the textile and garment industry, production volumes have been increased by 1.5 times due to the modernization of existing enterprises and the launch of new ones, and by 2.5 times due to the expansion of food production. Support for entrepreneurship continues, and effective work is being carried out under the action plan to create more than 2,500 new business entities. Development of entrepreneurship, creation of new jobs, and employment of the population and increasing its income is one of the priority tasks.

In this regard, our state has established the necessary measures to stabilize the economy and support business representatives. The head of our state has created all the conditions for doing business in our country. Their rights are guaranteed in the adopted legislative acts, and privileges and benefits are provided. The number of entrepreneurs who are effectively using the opportunities provided to expand their activities and create new jobs is increasing. During the past year, 266 new business entities were established. As a result of assistance provided to inactive and "zero" enterprises, the activities of 95 business entities were restored. Commercial banks allocated 19.701 billion soums in loans to 242 entrepreneurs. At the same time, 455 applications were given a positive conclusion based on the results of scoring, in accordance with the Resolution on the allocation of loans by the assistants of the mayors in the mahallas. Within the framework of the regional investment program, a total of 20 projects with a total project value of 584.5 billion soums, of which 233.7 billion soums from own funds and 30.9 billion soums from loans from commercial banks, as well as 25.0 million dollars from foreign investment, have been formed, and it is planned to create 922 new jobs as a result of the launch of these projects. In particular, 55 new jobs were created as a result of the organization of a modern shopping complex by the family enterprise "Shorchi Sevimli Supermarket".

Limited Liability Company “Limon Agro Best Trade” organized a catering point, providing employment for 10 citizens. As a result of the organization of the private enterprise “Azizbek Shorchi”, specializing in the production of shoes, 6 jobs were created. In addition, 17 additional projects worth a total of 14.8 billion soums were launched, resulting in the creation of 66 new jobs. There are more than 700 households in the "Olatemir" neighborhood of the district. About 40 of them have built greenhouses and are earning additional income, making their lives more prosperous. They are growing lemons and tangerines and earning a good income. The owners of the Shorchi farms have learned the art of growing citrus fruits. There are families who grow plants such as mangoes and bananas in greenhouses and are getting good yields from them. Many types of lemons and tangerines are grown. This also ensures employment for women. Farming is becoming a major source of income in Shorchi. Families who work hard and use it productively are making their livelihoods prosperous and their homes prosperous. The regions are emerging with their own directions in agriculture.
