

HOMESTEAD USE INCREASES POPULATION INCOME

Nigina Shoeva

Shorchi district administration

Head of Information Service

In accordance with the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan dated March 28, 2025 “On additional measures for the effective use of household plots and peasant farms”, effective work is also being carried out in the Shorchi district of the Surkhandarya region of the Republic of Uzbekistan.

The Uzbek people have always had a tradition of using the land productively. For this reason, today, every citizen of our country is working to make his family prosperous and his table full by using his land productively. After all, the land is the treasure of the household. And the household of a family that uses it effectively will be blessed.

-A homestead is beneficial to those who know, - says Mamadi Khudoynazarov, a resident of the Tolli mahalla of Shorchi district of the Surkhandarya region of the Republic of Uzbekistan. - If you take care of the land and cultivate it, the table will be full, and the household will be prosperous. The main thing is to use the land wisely. In fact, a homestead is beneficial to those who know. True, many people did not pay attention to this before.

It was no secret that some households were burning land. Now this issue has been raised to the level of state policy. Since we have fertile land and a large yard for earning income, each of us is responsible for improving the culture of gardening, making our homes prosperous and our living conditions exemplary. The productive use of land is the basis for the integrity of our households and the abundance of our markets.

In fact, Ahmad Kozimurodov, a native of this land, who received the hadith of farming, does not miss the opportunity, and without leaving the palm-sized land empty, he is earning a good income by planting crops.

Effective use of land means creating a solid foundation for living well-being.

It is no exaggeration to say that in accordance with the Government Resolution "On Additional Measures for the Effective Use of Land Areas of Households and Peasant Farms," the Shorchi District of the Surkhandarya Region is coming forward with new initiatives.

Solar panels are being installed on two 20-liter wells in the "Joyilma", "Bakhshtepa-1", "Oynakul", and "Tolli" neighborhoods, which are only able to harvest their crops once a year due to water shortages.

In fact, in these neighborhoods, most residents have established greenhouses to make efficient use of their land. A greenhouse, which allows for harvesting throughout the year, is an efficient way to utilize their land.

We visited the home of Nuriniso Khudoyorova, a resident of the "Boston" neighborhood of Shorchi district. Our hero, who received a 33 million soum loan on the recommendation of the assistant to the governor, grew unsown crops in her greenhouse.

There is no one. Banana and kiwi seedlings are also being grown as an experiment in the greenhouse where strawberries and various vegetables are grown.

-At first, we grew lemons and tangerines in our greenhouse, - says N. Khudoyorova. - We couldn't save them during the cold two years ago. Now, along with various vegetables, we are also growing strawberries. We planted banana and kiwi seedlings as an experiment. It is not easy to grow these seedlings and get the desired yield. In the future, if we manage to cultivate banana and kiwi seedlings as a result of our hard work and research, we will be able to grow more of these products. In fact, it is useful to know the land mine. Actually, many people did not pay attention to it before. It was not a secret that the lands of some houses were burning. And now we are happy to see those who use the farm and improve their livelihood.

- If you take care of the land and cultivate it, the table will be full and the household will be prosperous, says Rustam Tashmirov, a resident of the "Boston" neighborhood of Shorchi district. - It easily supports a large household. We use the farm effectively, hold weddings, and educate our children. Our annual income is not limited. It reaches 35-40 million soums. If we didn't have the farm, where would we find so much money?

In fact, there is soul in the words of brother Rustam, who received the hadith of farming. It's good to know the land mine. After all, miss the opportunity during the spring planting crops, growing seedlings, and generally using the land productively means creating a solid foundation for living well-being without giving it away.

Rustam Tashmirov is engaged in poultry farming along with farming.

-Today, people's attitude towards the land has changed radically, and their interest in farming has increased, - says Rustam Tashmirov. - It's true, today our markets are full of various agricultural products. The prices are also affordable. They are not that expensive. Whatever you are looking for in our markets, you will find it. But there is something special about consuming produce grown on your own farm every day. First, you don't have to spend a fortune. Second, there is a unique taste of seeing the fruits of your labor. Third, you can use what you need for the day. They say that the bread of labor is sweet. Thanks to our labor, our household is complete, our table is full, and our food is plentiful. Of course, today, there are many of our compatriots who work hard on their farms, making ends meet, and supplying our markets with high-quality and safe food products. With them, our tables are full, and our markets are full of agricultural products.

No matter which neighborhood you go to in Shorchi district, someone is engaged in flower growing, someone is engaged in strawberry growing, and some households are engaged in agricultural production. By effectively using their homestead, every household can earn a good income. After all, a homestead is a treasury. The farmers, who understand this well, are using their land effectively and working for the prosperity of their households and the prosperity of their families. The number of households that grow food crops in all four seasons of the year and earn a significant income from it is expanding every year.

In all 53 neighborhoods of Shorchi district, you can find delicious tomatoes, cucumbers, cabbage, bell peppers, various greens, strawberries, and other products in the greenhouses of citizens. There are many families who work hard on their farms and earn more. Indeed, the homestead is the greatest treasure. If we work hard and use it effectively, our life will be prosperous. Because from work comes wealth, and from life comes beauty.
